

# MEC has what you need to take your fleet to the next level!

Quality and Innovation for over 40 years

## A Better Solution

- **Direct Electric Drive** on every model for higher duty cycles, reduced oil leaks, lower maintenance and higher residual value
- Featuring **Micro 1330SE** and **Micro 19®** electric slab micro scissor lifts – construction grade durability in the most compact size available
- Offering the only **45 ft. (13.7 m)** (51 ft. working height [15.5 m]) electric scissor lifts

# Here's why MICRO is Better...

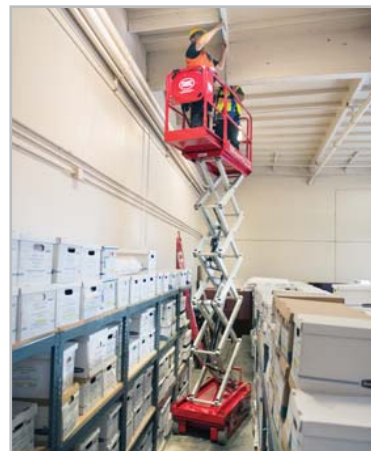

## Spacious Platform Supports 2 Workers

- Generous workspace supports true 2-person capacity with standard 2 ft. (60 cm) roll-out extension deck
- 360-degree work access
- 500 lbs. & 530 lbs. (226 kg & 240 kg) capacity and over 6 ft. (1.8 m) of platform space maximizes productivity & material usage

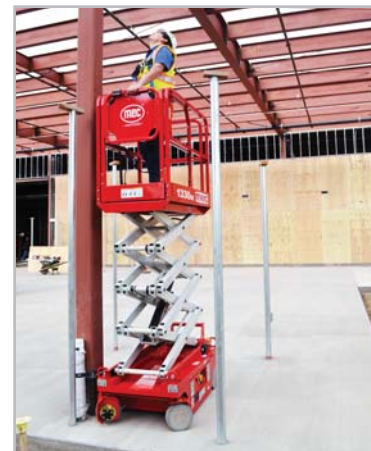

## Extended Duty Allows for More Work & Less Charging

- Up to 3 shifts on a single charge
- Opportunity charging allows simultaneous charging and operation
- Single AC receptacle powers charger and platform power

## Micro Design for Easy Accessibility in Tight Spaces

- Highly maneuverable to fit in tight spaces including personnel and freight elevators
- Compact footprint incorporates full size productivity
- Low gross vehicle weight and non-marking tires work safely on most fine surfaces with low floor loading pressure

## Direct Electric Drive for Faster, Quieter & Smoother Operation

- Longer operating times between battery charges
- DC drive motors provide smoother, more precise controls
- Quiet operation for confined areas

## Low Maintenance Reduces Total Cost of Ownership

- Sealed AGM maintenance-free batteries and fully automatic voltage compensating battery charger
- Fewer fittings and hydraulic hoses for reduced wear and leak issues
- Roll-out module for easy access

## The MEC Advantage of Innovation 40 Years & Counting

- Direct electric drive advantage for exceptional performance
- Lift control orientation for better safety
- Originator of pothole protection system
